

AOV Rebuild Pipeline Master Suite - Installation Guide

AOV_Rebuild_Suite/

|—— menu.py # Bootstrapper Script

|—— aov_core_script.py # Core Asset

Installation Steps

1. Open your personal Nuke configuration directory (typically located at C:/Users/YourUsername/.nuke/).
2. Locate your menu.py file. If it does not exist, create a new plain text file and rename it exactly to menu.py.
3. Add the following line of code at the very end of the file:

```
nuke.pluginAddPath(r"REPLACE_WITH_YOUR_ACTUAL_PATH/AOV_Rebuild_Suite")
```

Note: Replace REPLACE_WITH_YOUR_ACTUAL_PATH with the actual local or network directory path where you extracted and stored the AOV_Rebuild_Suite folder.
